As a result of our continuing growth, Labstat has the following employment opportunity available:

Database Administrator
Posting # 2018-31

Working as a member of our Programmer team, the Database Administrator role will improve and maintain our databases and MS-SQL Server.

Qualifications include:

- Proficiency with relational data models including normalization best practices, logical schema creation & maintenance, and entity model support for ORM development.
- Monitoring production databases to catch potential problems, watch for trending issues.
- Experience with Installing, set-up, and configuration of MS-SQL Server
- Understanding of Performance Tuning: Add indexes and tune MS-SQL Server performance parameters to best support production and development.
- Experience with creation of High Availability and Disaster Recovery plans and implementation
- Knowledge of data warehousing and reporting strategies
- Preferred experience with Azure (or any) Cloud, and Multi-tenant implementation

The successful candidate will possess a BSc.Computer Sciences, with 10 + years' experience as a Data Administrator/Modeler.

You are the ideal candidate for the above position if you have a demonstrated commitment and enthusiasm for working in a team-based environment. You have excellent communication skills, high energy, and a willingness to learn and achieve results.

Qualified applicants should apply with confidence quoting the appropriate posting #.
