

CASE STUDY

Consistent Test Results and Industry Leading TAT Help We Grow BC Ltd. Set Bar for Quality

We Grow BC Ltd. uses leading breeders, advanced genetics, and finely tuned processes to produce some of the highest-quality, highest-THC products on the market. They undergo more than 10 audits per year from Health Canada and other regulatory bodies to ensure their products are produced safely and they are compliant with Good Production Practices (GPP) and Good Agricultural and Collection Practices (GACP).

To meet compliance requirements, We Grow BC needed a laboratory partner capable of providing consistent and reproducible results on time so they can be confident in their product quality and label claims. A discrepancy between a label claim and an audit result can lead to an expensive compliance violation.

Labstat provided the consistency, reproducibility, and fast turnaround time that We Grow BC needed. “The professional service from Labstat is the standard against which I hold other labs,” said Kyle Boniface, VP of Quality and Compliance. In fact, Labstat Inc., A Certified Group Company, fulfilled 884 tests during a 10-month period with zero out of specification (OOS) results due to lab error.

Labstat also provided ideas for increasing We Grow BC’s business and consistently responded to inquiries on the same day. “Being able to pick up the phone and talk to someone who is experienced and knowledgeable about our industry is key,” said Boniface. “Labstat delivers on the tests and customer service.”

CHALLENGE

Produce cannabis products that are prized for their quality and high THC content.

DIFFICULTIES

Meet strict regulatory compliance standards and internal quality goals with a small team.

SOLUTION

Provided consistent test results with industry leading TAT along with responsive service and business development ideas.
